APPL-DATE: June 20, 1991

INT-CL (IPC): G06F 15/30; G06F 15/30; G07D 9/00

ABSTRACT:

PURPOSE: To know the transaction information in a short time by
permitting a host computer to transmit the transaction information
inputted from a cash automatic transaction device and a bank terminal
to a terminal equipment and to a facsimile according to the conditions
of transaction and to transmit information to the terminal equipment
and to the facsimile after processing it according to the processing
conditions.

CONSTITUTION: A customer performs transaction using the bank terminal
such as a cash automatic transaction device, and inputs the FAX number
of the transfer destination of this transaction information. This
transaction information is sent from the bank terminal to the host
computer, and transferred from the host computer to an arbitrary place
through a telephone line. When the transfer destination number of the
information is registered in an account, the transaction using the
account is automatically transferred. When some money is paid into the
account, a person having the transfer destination account can get the
information as soon as the transfer is performed and know the
completion of the transfer instantly.
